

TEJASWINI VENKATROYALU

UI/UX Designer · Frontend Developer · Product Designer

+65 9162 3031 · tejaswiniroyalu2003@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

PROFILE

UI/UX designer and frontend developer with hands-on experience designing for large-scale government projects at NCS, and leading end-to-end product design for academic capstone projects in collaboration with Google and DSV. Skilled in translating user research into high-fidelity Figma prototypes and building them with ReactJS. Currently completing a Bachelor of Engineering (Computer Science and Design) at SUTD, graduating May 2026.

WORK EXPERIENCE

UI/UX Design Intern · NCS, Singapore

Aug 2024 – Jan 2025

- Designed across multiple large-scale projects for government clients including SkillsFuture, NTUC, and LTA, covering all stages of the UI/UX lifecycle.
- Led client discovery sessions and translated requirements into low-fidelity paper prototypes through to polished high-fidelity Figma prototypes.
- Participated in usability testing sessions and iterated designs based on stakeholder and user feedback.
- Planned, designed, and managed NCS's booth at Singapore Design Week — coordinating logistics, visual materials, and marketing campaigns.

PROJECTS

AI Warehouse Monitoring System · SUTD × DSV, Singapore

Sep 2025 – April 2026

- Led end-to-end UI/UX design and frontend development of a deployed AI-powered warehouse monitoring system — conducting on-site user interviews, building 3 Figma prototype iterations, and shipping a React/Vite portal used daily by DSV supervisors at their Tampines warehouse.
- Achieved a 98% reduction in safety violations on Dock 5 (from 100+ violations/week to under 10), with five-figure operational cost savings and 960kg of CO₂ saved annually — success led DSV to engage external vendors to scale the system across multiple warehouse docks.
- Designed the incident review interface around 4 core principles (simplicity, clarity, modularity, traceability), integrating an embedded Power BI analytics dashboard aligned with the client's existing reporting workflow.

Digital Identity App for Refugees · SUTD × Google × Gebirah, Singapore

May 2024 – Aug 2024

- Led the full UI/UX process — from user research and Google-mentored discovery sessions to final prototypes — for a mobile app enabling digital identity access for refugees, built in collaboration with Gebirah.
- Project is now live on Gebirah's company website and under consideration for future scaling; created user flows, wireframes, and interactive prototypes in Miro and Figma, and built the frontend using ReactJS and Vite.

VR/AR Video Game · Technical University of Berlin, Berlin, Germany

Jul 2023 – Aug 2023

- Designed and developed a video game focused on Virtual and Augmented Reality as part of an intensive summer programme.

EDUCATION

B.Eng. Computer Science and Design · Singapore University of Technology and Design (SUTD), Singapore Sep 2022 – May 2026

- Exchange semester at Chalmers University of Technology, Gothenburg, Sweden (Jan – Jun 2025).

TECHNICAL SKILLS

Design: Figma, Miro, Canva, WordPress

Frontend: ReactJS, JavaScript, HTML/CSS, Vite, TypeScript

Other: Python, Ruby on Rails, Android Studio, Unity

ACTIVITIES & AWARDS

Sponsorships & Outreach Lead · SUTD Freshmen Orientation Committee, Singapore May – Sep 2023

- Co-authored 400+ outreach emails securing over \$20,000 in sponsorships and product donations for the orientation programme.

Outreach Volunteer · NCS Singapore Design Week, Singapore

May – Sep 2023

- Produced promotional video content and facilitated interactive design-thinking activities, introducing the public to NCS's DRIVE framework.

Community Project Lead · Freshmore Asian Cross-Curricular Trip (KMUTT Thailand), Thailand

Sep – Jan 2024

- Led a cross-university project to improve educational environments for underprivileged students in rural Thailand, overseeing LED lighting installation and electrical modernization across three schools.

🏆 SUTD Student Service Award

🏆 AWS DeepRacer 7th Position
